SKILLS

Programming Skills:

Python	HTML
CSS	Javascript
React	

EDUCATION

Good

Faculty of Commerce,
Zagazig University

2018 - 2022

LANGUAGES

Arabic ██████████████████

English ████████████████

PROFILE

I love crafting amazing online experiences as a Junior Front-end Engineer. I'm really good with HTML, CSS, JavaScript, and React, using them to mix creativity and functionality in my code. I also know Python basics, Git/GitHub well, and understand data structures, which helps me build strong solutions.

I've done lots of cool projects: making cool websites with HTML and CSS, creating dynamic interfaces with HTML, CSS, and JavaScript, and building big apps using React.

I'm passionate about making ideas into awesome websites that people love. Challenges excite me, and I'm always improving my skills to make sure every line of code I write adds to a great user experience.

WORK EXPERIENCE

Junior Front-end Engineer

Almdrasa - المدرسة   Nov 2023 - Present

I joined Almdrasa's Front-end Diploma program and learned a lot about HTML, CSS, JavaScript, and React online. The teachers were really good, and I used what I learned to create a website that works well on all devices. I also improved a React app by using what I learned in class. We had chat groups where I worked with teachers and friends to make the code better, and it made our projects much faster and smoother.
